

B-T-S Project, Seventh Grade Due Date: _____

In the world we live in, we are surrounded by numbers in our everyday lives. As you go throughout your day, think of the many times that you see or use math. On the attached page, fill in the eight outer sections with a drawing of where you used or saw math or numbers being used with a word or brief sentence. In the center circle, draw or glue a picture of yourself and write your name. All pictures must be colored with colored pencils. You may be surprised how often you see and use math in one day. Have fun exploring the wonderful world of numbers. ~*Psalm 90:12 Teach us to number our days.*

~Mrs. Kortenhoeven
